

## **GROW YOUR OWN REDWING CROP!**

- 1. Give each child a plastic cup or container**
- 2. Label each cup with the child's name**
- 3. Tear up 5 cotton balls and put them in the bottom of your cup**
- 4. Put about 10 seeds on the cotton balls**
- 5. Water until cotton balls are wet**
- 6. Check your seeds each day and water them again when the cotton balls feel dry**
- 7. Estimate how long it will take your seeds to come up! (approx 7 days)**

**8. When your crop has grown, you can plant it in your garden at home!**

**9. When your crop has grown really big, you might be able to harvest some grain or seeds off it and see what you can cook with it!**

**Have fun!**
